# About Immersive Technologies LLC

Immersive Technologies LLC, backed by its managers and staff expertise is active in the AV and Automation Market for over 40 Years.

Established and still active at market forefront in Toronto CANADA under the name AMZ Design Co. in early 1980s.

We have offices in New York (USA) and Hannover (Germany)

We are expert in Design, Supply and Installation of Home Technologies (Automation and AV), Cinema and Auditoriums as well as Lighting Design.

# Recommended Technology

**JUNG**  
MADE IN GERMANY SINCE 1912

We strongly recommend KNX Technology from JUNG company for controlling of Lighting, Shades, HVAC and security.

JUNG is a highly reputed German made brand with over 100 Years of market background.

And, for **AV Distribution System** we greatly recommend Crestron Technology.

Crestron is a highly reputed USA brand in the AV Technology & Smart Home systems.

# What is KNX?

## KNX – the worldwide standard

KNX is the intelligent, worldwide standard for modern buildings. KNX is a futureproof standard. Having KNX Technology at home makes it possible not only for the investors and owners, but also planners, architects and electricians to have long-term security.

From easily operated controls to complex systems, the KNX components offer comprehensive, futureproof solutions for controlling, visualization and organization of the building system technology. The smart KNX products cover areas such as lighting, shade, HVAC, security and multimedia.

As early as 1990, JUNG founded the European Installation Bus Association together with other companies. With the development of the European Installation Bus, we laid the foundation for the KNX standard that is uniform across the world today.

# What is Crestron®?

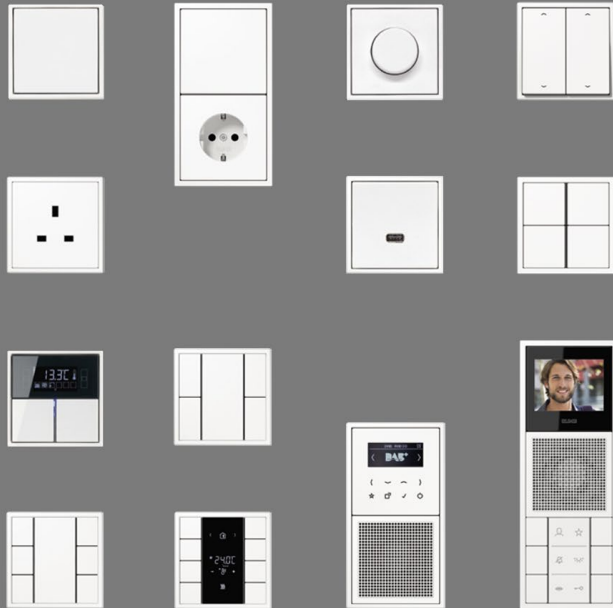

## KNX—the worldwide standard

Crestron is the world's leading innovator and manufacturer of advanced control and automation systems for the home, campus, and office, reinventing the way people live and work. With integrated solutions to monitor, manage, and control audio, video, and lighting, shades, and climate, Crestron streamlines technology to improve the quality of life for people in their homes, corporate boardrooms, conference rooms, classrooms, hotel rooms and auditoriums.

## PUSH-BUTTON SENSOR IN LES COULEURS® LE CORBUSIER

Worldwide exclusive in 63 colours

Le Corbusier (1887–1965) is considered to be one of the most significant architects of the 20<sup>th</sup> century. To this day, Le Corbusier's work has had a substantial influence on architecture and design. For Le Corbusier, colour was just as important as layout or form for his buildings and designs.
